

Fish Tricks

Fish have spots and stripes to confuse other fish and provide camouflage. See how many fish you can find in the zoo's aquariums with these markings. Write their names on the lines.

Eye Bar

The dark stripe helps hide the eye, so a predator may not know which end of the fish contains the head.

List the fish with eye bars seen in the tank

Stripes

Stripes break up the outline of the fish's body, making it hard for a predator to see the fish.

List the fish with stripes seen in the tank.

Eye Spot

Eye spots may trick predators into mistaking the fish's tail for its head.

List the fish with eye spots seen in the tank.
